# Identity Intelligence

Prevent compromised credentials from compromising your business.

- Detect compromised credentials: Instantly identify and prioritize exposed accounts.

- Monitor underground markets: Get real-time alerts on credential threats.

- Reclaim stolen access: Take action before accounts are exploited.

Password Policy

Length

Characters

Complexity

Compromised Accounts

Host Domain	User	Password	Breach Name	IDP Status
		*****		Active
		*******		Active
		******		Active

Mitigate your exposure. Limit damage to your operations.

From the onset of activation, the Identity Intelligence & Credentials module provides immediate data on compromised accounts and continuously monitors organizational domains across the cybercriminal underground in real time, so your team can safeguard priority assets and proactively remediate threats.

STEP 1
Detect risks

Detect compromised credentials at their earliest appearance and get a head start in mitigating risks.

STEP 2
Gather Intel

Equip your security teams with the data and tools they need to act decisively and efficiently.

STEP 3
Automatic remediation

Quickly address credential leaks to prevent unauthorized acces, and buy back access as needed.

STEP 4
Improve posture

Neutralize threats before they escalate into significant breaches, protecting business operations.

Real-time cyber threat intelligence from the clear, deep, and dark web

70B+

Credentials currently in our database.

1B+

Compromised credentials added weekly.

1000+

Underground forums and marketplace crawled.

< 1 min

From data collection to item display and alert.

Detect and respond to compromised credentials before attackers act.

View most updated compromised identity credentials for your domains.

Customizable alert setup according to organizational preferences.

Advanced filter capabilities, including identity provider integrations (IdP) and password policies, for precise credential leak filtering.

Access Breach & Endpoint information collected by Stealer malware for organizational risk analysis.

Capability to assign prioritization criteria for compromised credentials according to organizational needs.

Threat Intelligence Services

DEEP AND DARK WEB PURCHASES

Purchase compromised credentials listed for sale on the deep and dark web.

BI-WEEKLY CREDENTIALS REPORT

Statistics and analytics providing visibility into threat exposure.

PURCHASE SUMMARY REPORT

High-level one-pager highlighting information about purchased data.
